Engineering Student, EPITA (Systems, Networks, Security & Infrastructure) | Open to internship opportunities from February 2027

Summary

Fifth-year EPITA student in Systems, Networks, Security & Infrastructure. I'm currently part of La Forge, the team that runs EPITA's internal infrastructure. I like building and automating systems, and I've been doing it seriously for 4 years now. Open to internship opportunities starting February 2027.

Professional Experience

La Forge (EPITA internal infrastructure team) — *Kremlin-Bicêtre*
Student Contributor — *Feb 2026 - Present*

- Build and maintain EPITA's intranet, used notably during the piscine (intensive first-year bootcamp) and workshops.
- Provide internal support for the school's tools, for both teaching staff and students.
- Develop internal Java microservices, deployed on Kubernetes via GitOps workflows with Argo CD.
- Build and maintain NixOS images as Infrastructure as Code, deployed fleet-wide across EPITA's student lab machines over netboot.

CEA Saclay (DES/ISAS/DM2S/SGLS/LCAN) — *Gif-sur-Yvette*
Intern — *Sep 2025 - Jan 2026*

- Built and automated GitLab CI/CD pipelines for TRUST, a thermohydraulics simulation platform used by CEA researchers.
- Deployed the supporting infrastructure as code: GitLab Runners, a MinIO S3 artifact cache, and a Prometheus/Grafana observability stack.
- Integrated automated non-regression test suites for TRUST's satellite projects (Baltiks) into the main pipeline.

RedPill Group — *Paris*
Intern — *Jul 2024 - Aug 2024*

- Contributed to migrating infrastructure to a fully cloud-hosted Kubernetes cluster on OVHcloud, using Terraform and Helm for deployment.
- Built local Kubernetes proof-of-concept environments with Kind to validate infrastructure approaches before rollout.

Education

EPITA (École Pour l'Informatique et les Techniques Avancées) — *Kremlin-Bicêtre*
Engineering Degree in Systems, Networks, Security & Infrastructure — *2022 - Present*

- Advanced networking (OSI/TCP-IP, OSPF, BGP, multi-site LAN/WAN design) and Linux/Windows systems administration.
- Windows/AD hardening, offensive security (malware analysis, reverse engineering, binary exploitation, penetration testing), and applied cryptography/PKI.
- SOC/SIEM incident response, information warfare, and IS security policy & compliance.

Institut Teknologi Sepuluh Nopember (ITS) — *Surabaya, Indonesia*
Exchange Semester — *Feb 2024 - Jul 2024*

Associations

L'Atelier, EPITA — *Kremlin-Bicêtre*
Vice-Treasurer | Tech Lead — *2024 - Present*

- Manage the association's VM infrastructure with Proxmox.
- Deploy and maintain the association's services on Kubernetes.

Skills

Programming	Python, Java, JavaScript / TypeScript, C, Bash / Shell, SQL
Systems & Infrastructure	Kubernetes, Helm, Argo CD, GitLab CI, Terraform, Docker, Prometheus, Grafana, Linux, Nix, Ansible, Loki
Also used	GitHub Actions, Renovate, Podman, Rancher, Windows Server, Active Directory, pfSense, WireGuard, Palo Alto (PAN-OS), Stormshield (SNS)
Languages	French (Native) | English (Professional, TOEIC 970)
Interests	Music (piano, audiophile) | Beer & zythology (LATEB, EPITA) | Homelab (Linux, Nix, microvm.nix)
